ASSE SJ ID 232 JOB DATE 6/25/2009

JOB TITLE **Senior Safety Specialist-Sacramento, CA**

SALARY

COMPANY **Parsons**

DESCRIPTION Parsons--Designing the future of Global Engineering.
Senior Safety Specialist-Sacramento, CA

Parsons is actively seeking top talent! Realize your potential as part of the powerhouse team we have developed to spearhead this exciting effort!

POSITION OVERVIEW:

Advises and assists Project and Construction Management in the formulation, implementation and management of major project safety plans. These plans may pertain to one or more job site locations, which are separate and distinct construction operations requiring integrated supervision of programs. Reports functionally to the senior construction site representative and organizationally to the Safety Manager. Ensures that the project safety plan reflects company policy and provides a coordinated plan for the overall project which complies with the prevailing safety requirements at each location.

SPECIFIC RESPONSIBILITIES:

- Advises and assists the senior construction site representative in the establishment and management of the job site safety program, identifying and eliminating/controlling any hazards to persons and property.
- Inspects the job site to detect and correct safety hazards.
- Supervises first aid personnel in providing first aid care of occupationally injured or ill personnel.
- Audits the job accident records and periodically prepares an audit report of these records.
- Initiates and conducts of accident investigations and prepares job accident reports.
- Represents management during safety inspections of the job site by regulatory authorities or company insurance carriers.
- Receives, reviews and distributes safety inspection reports with recommended corrective actions.
- Performs other responsibilities associated with this position as may be appropriate

PREFERRED EDUCATION/EXPERIENCE:

- 4-year degree in Health and Safety or related field
- 5-10 years of related work experience in the field of Health and Safety
- 5-10 yrs experience managing safety and health programs for an Electric Utility or Hydro-Power provider a plus
- Certified SAFETY Professional (CSP) or Certified Industrial Hygienist (CIH) designation is preferred
- Experience with applying behavior based SAFETY techniques is preferred

SKILLS/COMPETENCIES:

- Requires a thorough knowledge of Federal and state health and safety regulations and reporting procedures, as well as good communication and interpersonal skills
- Ability to research pertinent facts, data and other information from internal and external sources
- Effective oral and written communication skills
- Proficient use of computer and corresponding programs - Word, Excel, PowerPoint

Experience a dynamic global company that is committed to a sustainable world and the communities it serves. Parsons forged its leadership on the forefront of innovative change in the fields of engineering, project and construction management. Today, our employees work closely with our clients to deliver landmark projects in healthcare, life sciences, alternative fuel and energy, education, and environmental remediation. From implementing engineering solutions that help modernize the world's education and municipal infrastructure, to designing world-class luxury resorts for exotic locations, Parsons is helping to build a safer and healthier world.

Parsons offers an ethical, challenging, diverse, rewarding and fun work experience where enthusiastic, responsible people use their energy, talent and dedication to make a difference in the world.

We provide career growth and development, a competitive compensation and benefits package which includes medical, dental, vision, and life insurance; tuition reimbursement program; credit union membership; Employee Stock Ownership Plan and a 401(k) plan. Parsons is an equal opportunity, drug-free employer committed to diversity in the workplace. M/W/D/V.

Parsons, an engineering and construction firm with revenues exceeding \$3.4 billion in 2008, is 100% owned by the Employee Stock Ownership Trust. We surmount the toughest logistical challenges and deliver

ASSE SJ ID 225 *JOB DATE* 6/8/2009

JOB TITLE **Part-Time Risk Control Analyst (Safety Officer)**

SALARY

COMPANY **Bickmore Risk Services**

DESCRIPTION Bickmore Risk Services is the leader in the Risk Management Industry in offering its clients solutions to satisfy Workers' Compensation, General Liability and Employment Practices needs. We are a growing company that values its employees and offers competitive compensation. We are currently seeking a part-time Risk Control Analyst to fill a 2-day per week, long term assignment for a school district located in Southern California.

Part-Time Risk Control Analyst (Safety Officer)

SUMMARY OF RESPONSIBILITIES

With limited supervision, the Risk Control Analyst helps clients control their risks, comply with risk control best practices, safety codes and standards. The Risk Control Analyst also assesses safety cultures, develops safety programs and policies, and trains managers and workers in value-based safety program administration based on the principles of Systems Thinking and Enterprise Risk Management.

KEY DUTIES

- Conducts client on-site safety and loss prevention surveys and prepares reports of visits as required
- Performs analysis of losses to identify opportunities for action
- Audits client members' risk control programs as required
- Executes annual safety and loss prevention programs
- Assists in the identification of clients' contractual exposure to losses
- Evaluates client loss information and trends and prepares reports
- Provides technical expertise, advice, and direction on safety matters to management, TPAs, insurance brokers, members, etc.
- Attends and supports client Board, Executive Committee, and Safety Committee meetings
- Researches and compiles reports relevant to risk management questions
- Upon request, develops and presents workshops, training, seminars, etc.
- Performs other tasks upon request

SKILLS AND ABILITIES

- Reads, analyzes, and interprets general business correspondence, periodicals, professional journals, technical procedures, codes and regulations
- Writes reports, business correspondence, and procedure manuals
- Effectively presents information and responds to questions from groups of managers, clients, and other third parties
- Exhibits fundamental mathematic skills, including but not limited to, addition, subtraction, multiplication, and division in all units of measure, using whole numbers, common fractions, and decimals
- Exhibits ability to compute rate, ratio, and percent, to draw and interpret graphs and use basic statistics in assessing risk control and safety programs, and safety perception survey results
- Solves practical problems and deals with a variety of abstract and/or concrete variables in situations where only limited standardization exists
- Interprets a variety of instructions furnished in written, oral, diagram, or schedule form
- Team player who delegates work appropriately, receives delegated work in an appropriate manner, and assists other employees as necessary
- Interacts positively with clients, staff, and other third parties
- Provides and accepts suggestions and feedback positively
- Works in a timely, organized manner, prioritizing workload and assignments
- Exercises sound judgment and utilizes initiative and creativity to identify solutions and solve problems
- Evidences proficiency in basic computer skills, and proficient use of all relevant software

QUALIFICATIONS

ASSE Greater San Jose Chapter Job Opportunity Report

- Four year degree in related field or equivalent experience
- Two to five years progressively responsible experience in risk control consulting
- Is making substantial progress toward, or possess one or more of the following risk control certifications: ARM, CSP, ASP, ACLM, COHN-S, etc. and/or a related safety certification: CPSI, CIH, CPE, CPEA, CIE, etc.
- Must have good problem solving, analytical, and planning skills
- Ability and willingness to travel
- Excellent presentation skills

JOB TITLE **Air Permitting Engineer**

SALARY

COMPANY **CASTLEREA ASSOCIATES**

DESCRIPTION I am an environmental consulting recruiter searching for an air permitting seller/doer on behalf of a national firm with a large operation in the East Bay area.

The client is in the Top 100 Engineering Firms and Top 120 Design Firms according to Engineering News Review (ENR) and in the Top 10 Environmental Consulting Firms according to the East Bay Business Times.

Their services include: agricultural studies, air quality, noise control, attorney services, ecological services, EMS, engineering, environmental engineering, remediation, information management, investigation, planning and development, quantitative services, risk management & water resources.

They are a sub of an international firm so they have a very broad reach and they have a very substantial and visible East Bay operation so the opportunity is attractive.

In addition, they have the capital to fund growth and a culture that promotes it.

They would like to bring on board an air permitting seller/doer who can help them to continue their growth in the region.

A BS in Engineering, environmental Science or related Science. The successful candidate will provide expertise on environmental issues dealing with Wastewater Management and related programs. As a member of the Corporate EHS Dept, the successful candidate will have the opportunity to work with multiple operating organizations, providing input on the direction of the company's environmental programs and gaining exposure to senior management.

EHS Manager (Eastern SD, north of Sioux Falls) for this international explosive manufacturer. This person will "sit" in SD at one of their plants and also be responsible for another plant in the Chicago area. Total employee population between the 2 plants is approximately 900. This position will have 2 direct reports; an adman and a technical professional. There will be approximately 25% travel between the two locations. The ideal candidate will have 8+ years ehs experience in a manufacturing environment which must include explosive safety experience and a BS in Safety, Environmental or related.

Several positions that I can not post include: Global Director of EHS (Chicagoland) PSM Coordinator, TX; PSM Coordinator, WY; EHS, WI.

NEW Full-Time EHS Consulting jobs nationwide. Those professionals that have eh&s consulting experience that would like to be considered for other consulting jobs, please contact me.

Positions are added weekly. If you or someone you know would like to be informed of future job opportunities as they become available, please forward their name and email address to pshrenker@comcast.net. Additionally I usually have a few other openings that I can't "publish" so please give me a call or email me if interested.

If you do not want to receive any more job opportunity listings, please email me at pshrenker@comcast.net to let me know.

JOB TITLE

Manager Environmental Health Safety & Security

SALARY

COMPANY

Baxter, Hayward, CA

DESCRIPTION

Develop, implement and administer all applicable environmental, safety, and occupational health management systems and policies.

Provide compliance with all federal, state and local environmental and safety regulations. Act as primary liaison with external regulatory agencies.

- 1) Provide leadership as the management representative for EHS. Influence and direct employees at all levels of the organization to achieve a solid culture of safety in a fast paced manufacturing environment.
- 2) Provide strong analytic and problem solving skills to manage a multi-faceted program in conjunction with key business partners on the senior management team.
- 3) Supporting business growth via managing permit revisions and new regulatory requirements.
- 4) Manage and oversee the Occupational Health Program. This includes worker compensation, case management and appropriate interfaces with corporate, division, human resource and legal representatives.
- 5) Functioning as a member of the facility's leadership team, develop and implement management systems concerning environmental, health, safety and issues using the ISO 14001 and OHSAS 18001 standards.
- 6) Monitor and maintain compliance with all facility environmental health and safety permits as required by law, regulation and company policy. Serve as the primary contact for regulatory agencies such as EPA and OSHA for inspections, permitting, reporting and associated administrative duties.
- 7) Manage and improve site waste management practices and strategies. Negotiate and secure contracts for hazardous and non hazardous waste disposal.
- 8) Define, maintain and manage the plant emergency management procedures to assure preparedness and organized management of crisis situations.
- 9) Serve as facility EHS liaison representing the facility in Baxter BioScience and Corporate EHS initiatives.
- 10) Champion resource conservation initiatives for energy and water

B.S. Degree in Environmental, Safety or related field, M.S. Degree preferred, (5-7 years of advanced experience may be substituted.)

Minimum of 5 years experience. Must be conversant in EPA, OSHA, and DOT regulations. Must be experienced in ISO 14001 and OHSAS 18001 EHS Management Systems. (A registered professional certification in the environmental or safety field (i.e. CHMM, CSP, or CIH is preferred).

Experience working in GMP and "clean room" environments preferred.

Excellent written and verbal communication skills. Candidate must be comfortable addressing employees at all levels of the organization individually and in group settings.

Experience in a high profile leadership position responsible for EHS acting as the primary management representative.

Ability to work independently, meet requirements and deadlines from multiple stakeholders, and execute tasks strategically in a fast paced manufacturing environment.

- Must be able to lift, push, pull and carry up to 50 lbs.
- In general, the position requires a combination of sedentary work and walking around observing conditions in the facility.
- Must be able to work in controlled environments requiring special gowning. Will be required to follow gowning requirements and wear protective clothing over the head, face, hands, feet and body.
- No make-up, jewelry, nail polish or artificial fingernails may be worn in the work environment.
- May work in a cold, hot, high-noise, or wet environments.
- May be required to work or be assigned to a different shift as needed.
- Must be able to work overtime as required.

ASSE Greater San Jose Chapter Job Opportunity Report

- Inside working conditions.
- Some Clean Room and cool/hot storage conditions.
- 5% travel.

ASSE Greater San Jose Chapter Job Opportunity Report

ASSE SJ ID 210 *JOB DATE* **4/26/2009**

JOB TITLE **Radiation Safety Technical Associate**

SALARY

COMPANY **Lawrence Berkeley National Laboratory (LBNL)**

DESCRIPTION Radiation Safety Technical Associate

Lawrence Berkeley National Laboratory (LBNL) is a world leader in science and engineering research, with 11 Nobel Prize recipients over the past 75 years, and 59 present members of the National Academy of Sciences. LBNL conducts unclassified research across a wide range of scientific disciplines and hosts four national user facilities.

Our Environment, Health & Safety (EH&S) Division consists of over 100 professional and technical staff members who are stewards of a national trust for a world-renowned scientific R&D organization. We protect the public's interest and investment in LBNL. To learn more about the EH&S Division and its work, go to <http://www.lbl.gov/ehs/>.

The EH&S Division has an exciting opportunity for a Radiation Safety Technical Associate within the Radiation Protection Group (RPG). This position is responsible for radiation protection support of the Radiological Work Permit (RWP) program during the Building 51 Bevatron demolition project. The Radiation Safety Technical Associate will independently inspect and monitor demolition and deconstruction (D&D) activities, equipment, and personnel to ensure and determine compliance with radiation safety standards and policies. Will also conduct incident investigations and work with assigned Health Physicists to communicate with various levels of project staff and subcontractors regarding findings and corrective actions. Another component of this position is to develop appropriate procedures as necessary to ensure compliance with applicable DOE and LBNL regulations. Being highly responsive to radiological emergencies and providing backup support to other radiation control technicians is also a critical element.

To qualify, you'll need significant radiation safety experience and extensive working knowledge of the theories which guide those practices. This position also requires experience independently handling the following: identifying/ analyzing radiological hazards, conducting ALARA and compliance reviews, conducting radiological investigations, documenting findings, analyzing and resolving problems of moderate scope and complexity. Additionally, you must have demonstrated procedure writing experience and the demonstrated ability to respond to radiological emergencies. Knowledge of applicable DOE and OSHA radiation protection regulations is essential. Active Radiological Control (RCT) qualification is also required.

Ideally, we are looking for an individual who has radiation safety experience in a research or similar environment. More importantly, the Radiation Safety Technical Associate will need to be highly resourceful in providing resolutions to routine and non-routine LBNL radiation safety issues. Current NRRPT certification is highly preferred.

- Physical requirements of the job include:
- Routinely lift/transport up to 40 lb. instruments
 - Frequently bend and stoop
 - Stand and walk for up to 4-6 hours per day
 - Successfully pass a routine physical and applicable training, including Respirator Fit Testing and formal HAZWOPPER training

NOTE: This is a two year Term Appointment with the possibility of extension contingent on availability of funding and/or work. This position is classified as an EH&S Technical Associate (N20.1) in the Technical Associate job family.

Learn more about this opportunity and apply at <http://jobs.lbl.gov/LBNLCareers/details.asp?jid=22361&p=1SID=2025>.

Berkeley Lab is an Affirmative Action/Equal Opportunity Employer committed to the development of a diverse workforce.

You will find Travelers to be full of energy and a workplace in which you truly can make a difference.

We are currently looking for a Senior Construction Risk Control Consultant. Please read on for more details regarding this position.

<http://jobview.monster.com/getjob.aspx?JobID=80084138&co=xtravelersx&ah=http%3a%2f%2fcompany.monster.com%2ftravelers&aj=Travelers+Companies%2c+Inc.&pg=6&pp=25&dv=1&re=4&AVSDM=2009-03-23+16%3a01%3a00&seq=11&fseo=1&isjs=1&re=1000>

JOB DESCRIPTION:

SUMMARY:

Reports to the Field Manager. Delivers risk control services to construction clients in assigned territory. May assume regional responsibilities for technically complex accounts. Provides technical advice and account information to underwriting business partners for risk assessment and analysis. Works on complex accounts for all lines. Markets Travelers and helps sell the deal to the customers. Works autonomously and generally has 8 plus years of experience.

PRIMARY DUTIES:

- Conduct loss control surveys at client locations to determine potential hazards and risk factors to be considered in underwriting/risk selection.
- Write technically detailed reports that provide a clear assessment of risk and clearly articulate recommendations.
- Serve as resource to Account Executive in development of the deal. Market Travelers to the client to help sell the deal.
- Consult with clients on ways to control hazards in order to reduce or prevent losses. Consistently influences clients to implement recommendations.
- Build and maintain productive relationships with underwriting and service teams assigned to support the business, with the broker/agent community, with Claim, with other Risk Control staff, and with clients.
- Conduct research for underwriters or clients on class of business, operations, unique or unidentified exposures, or any other technical subject requiring similar analysis.
- Analyze loss trends, recognize opportunities to provide risk control products and/or services which can help reduce losses. Explain how their recommendations or products can help minimize losses.

OTHER:

- Maintain current knowledge of regulatory environment and emerging safety issues. Can explain to customers how the issues impact them and what they can do. Identify where customer is falling short and use that as an example of why they need to follow the recommendation.
- Apply analytical and ergonomic skills to complete Claims Engineering Review.
- Maintain timely, relevant communications with the Regional Manager.
- Invites local consultants, brokers and agents on co-surveys when appropriate, to further develop/strengthen staff and develop relationships with brokers and agents.

Communication Skills:

- Makes complex technical information and recommendations understandable and clear to audiences with varied levels of technical knowledge
- Influences others to take action on recommendations, obtains consistent buy-in
- Listens effectively
- Clearly expresses ideas, recommendations, etc. in writing
- Demonstrates the ability to use behavioral interviewing techniques

Business Knowledge:

ASSE Greater San Jose Chapter Job Opportunity Report

- Possesses a strong understanding of both Property and Casualty lines of coverage
- Strong understanding of Commercial Lines insurance products
- Fully understands Risk Control performance standards
- Knows and understands the business plans for each marketing business unit

Technical Expertise:

- Has mastered Risk Control computer systems applications relevant for their area
- Handles assignments in all lines and technical disciplines up to the level requiring RSC or Specialist involvement including CERs, may be a RSC in one or more discipline
- Analyzes loss information to identify root causes and develop loss sensitive recommendations
- Handles most complex surveys that come into the office

Customer Service/Marketing:

- Understand customer wants and needs, recommend products and services that match their needs appropriately
- Markets Travelers and the Risk Control organization effectively to customers
- Provide input to underwriting to help leverage the deal
- Builds credibility with internal and external customers
- Creates customer satisfaction by demonstrating the value of risk control services
- Familiar with the risk control service tools available to clients, capable of helping client navigate through the risk control website
- Apply or locate appropriate resource for customer

Resource Management:

- Continually assesses workload in light of business priorities; directs own efforts accordingly
- Identifies methods for improving personal productivity
- Understands when it is appropriate to bring in the service or technical expertise of our specialists including specialty groups such as construction, technology and public sector

In addition to an exciting environment, we offer:

- * Competitive base salary with additional opportunities for variable pay through recognition programs and incentive awards
- * 401(k) with company match
- * Comprehensive health plans that include coverage for same sex/domestic partners
- * Strong work/family and employee assistance programs
- * Tuition reimbursement
- * Vacation Purchase Plan
- * Training/Development opportunities

We are proud to provide comprehensive, high quality employee programs to meet employees' needs now and in the future, including a very competitive financial package. Explore what we have to offer.

Travelers is an equal opportunity employer. We actively promote a drug-free workplace.

JOB TITLE **Senior Radiological Control Technician**

SALARY

COMPANY **The Shaw Group
San Francisco California**

DESCRIPTION Senior Radiological Control Technician opportunity located in San Francisco California

The Shaw Group provides premier engineering, design, construction, and maintenance services to government and private-sector clients in a wide array of industries, including the energy, environmental, infrastructure, and emergency response markets. We are currently seeking a Senior Radiological Control Technician in our San Francisco, CA office.

JOB DESCRIPTION AND RESPONSIBILITIES

The work will entail providing radiological support for site characterization, excavation of contaminated soils, removal of contaminated concrete, characterization of buildings, and final status surveys. Conduct radiation surveys of potentially contaminated areas and structures; perform surveys and collect samples to support field excavations and other remediation activities. Conduct environmental radiation surveys, survey of personnel and equipment and collection of environmental samples for radiological analysis. Must be experienced working under environmental QA programs; documenting activities, chain of custody, etc. Be able to recognize and communicate to the RSO and site workers shortcomings in radiological safety and characterization activities.

REQUIRED QUALIFICATIONS

Requirements: Must have OSHA 29 CFR 1910.120 hazardous waste 40-hour training, all subsequent annual 8-hour refreshers, and medical clearance for PPE and respirator use.

Minimum of 3 years experience performing radiological characterization/decontamination or equivalent support.

Additionally, education and training must meet the requirements of one of the following: Verifiable evidence of training, experience, or a combination of training and experience consistent with the requirements of American National Standards Institute/American Nuclear Society, Standard N3.1 - 1993, American National Standard for Selection, Qualification and Training of Personnel for Nuclear Power Plants (reaffirmed 1999), for Senior Health Physics Technicians; National Certification with the National Registry of Radiation Protection Technologists; Certification as a U.S. Department of Energy (DOE) Radiological Controls Technician consistent with the requirements of Title 10, Code of Federal Regulations, Part 835, Section 835.103; Evidence of NAVSHIPS 389-0288, Radiological Controls for Shipyards or NAVSEA 389-0153, Radiological Controls, Article 108, Qualification; or Two-Year Technical Degree in Health Physics or related field.

ASSE Greater San Jose Chapter Job Opportunity Report

ASSE SJ ID 200 *JOB DATE* 4/5/2009

JOB TITLE **Principal Health & Safety Technician**

SALARY

COMPANY **Lawrence Berkeley National Laboratory (Berkeley Lab)**

DESCRIPTION Lawrence Berkeley National Laboratory (Berkeley Lab) offers a great career opportunity to provide technical Environmental Health & Safety (EH&S) support to the Molecular Foundry, which is a user facility for the design, synthesis and characterization of materials with nanometer dimensions. Your primary role is to help ensure the safe running of Molecular Foundry labs and offices.

Key Areas of Responsibility:

- Manage hazardous waste (1/3 of the job)
- Manage the chemical inventory system
- Coordinate outgoing chemical shipments
- Ensure appropriate safety equipment is available for staff
- Schedule time sensitive events with internal and external parties
- Safety oversight of labs, shops, offices and other spaces within the user facility
- Help issue permits for vendors to perform work at the user facility
- Resolve safety issues by successfully interacting with internal scientists, technicians, administrative staff, and managers

Qualifications:

- Familiarity with chemical properties and/or handling chemicals
- Organizational skills and initiative to determine appropriate EH&S action and work methods
- Excellent customer service and thorough follow-up
- Excellent written and verbal communication skills to interact successfully with and disseminate information to various levels of staff
- Ability to apply applicable regulations, standards, and guidelines
- Proficiency with PC, including maintaining databases and developing spreadsheets to manage data

CONTACT

About us

Berkeley Lab is a U.S. Department of Energy national laboratory located in Berkeley, California. It conducts multidisciplinary research with key efforts in fundamental studies of the universe, physics, bioscience, nanoscience, clean energy, energy efficiency, the environment, and the use of computing as a tool for discovery. Eleven Nobel laureates are associated with Berkeley Lab, which is managed by the University of California.

JOB TITLE **Resume Posting Service**

SALARY

COMPANY **Propel Search Group**

DESCRIPTION This is Maureen McCarthy - the recruiter that specializes in placing Occupational Health Nurses and Environmental Health and Safety Professionals. We're starting a new program at Propel Search Group, and I'm hoping you'll help spread the word.

With today's tough economy, we've been getting a lot of resumes from people who have been laid off and/or are unemployed - many for the first time ever.

To help them find work, we have decided to post resumes of unemployed OHNs and EHS professionals for free on our website. They will be viewable for all to see for up to one year. If you know anyone who might be interested, please let them know.

They should send their resume as a Word Document to resume@propelsearchgroup.com <<http://www.propelsearchgroup.com/>> .

Propel Search Group will direct companies looking for candidates to check out our website first with no recruiter-fee attached. It can be viewed at www.propelsearchgroup.com <<http://www.propelsearchgroup.com/>> .

It's up to all of us to help jump-start this economy, and this is one small way we can utilize the tools we have to help get people working.

Of course, we're still in the business of recruiting and placing candidates. If our client companies cannot find who they are looking for on our website, we will conduct a customized search by direct recruiting.

On another note, if you know of any hiring manager that is looking for qualified OHNs or EHS professionals, please tell them to check out our website early and often. We will be adding new resumes as we receive them.

If you have any questions, please reply to this message. As always, forward this correspondence to anyone you feel appropriate!

As a special treat, please go to <http://www.bornagainamerican.org/> . Listen to the entire song and enjoy. If we all work together, we can not only bring hope back, we can get this economy moving again!

Thanks and best regards -
